

DigKids- Sunday, June 7th

Today the kids started into the Book of Genesis, where the adults will be joining them next week. In today's lesson, the kids learned about the creation of the world and all that God accomplished in 7 days! As part of the lesson, the kids made "Creation Calendars," and they decorated each day of creation with what God made on that particular day. Our Digkids activity for this week is to take one day of creation for each day this week and spend time talking about what God created on that day.

Monday- Light and Dark/ Day and Night

Tuesday- Sky

Wednesday- Land, Sea and Vegetation

Thursday- Sun, Moon and Stars

Friday- Fish and Sea Animals

Saturday- Animals and Humans

Sunday- God rested

Some examples of questions you might ask on the first day of creation are:

- *What did God create today? (light and dark)
- *What do you like about the light? Dark?
- *How do we use it?
- *What would we do without it?

Finally, we would love for you to spend time thanking God for what He created that day. Have each child say a prayer of thanks for how the things that God created help them.
